REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a solid oxide fuel cell having a ferritic stainless steel substrate having a porous region and a non-porous region, and above said porous region of the ferritic stainless steel substrate is located a fuel cell assembly and on the opposite side of the porous ferritic stainless steel substrate is located a ferritic stainless steel bipolar plate that is sealingly attached to the non-porous region of the ferritic stainless steel substrate.

The closest prior art of Jaffrey discloses a porous conducting layer of stainless steel in contact with an aluminum or ferritic stainless steel bipolar plate. The reference is silent to the porous conducting layer having a non-conducting region and to the porous conducting layer being in sealing attachment to the bipolar plate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571 272-1302. The fax phone
